Data Sheet : *Self Assembly Portable Cubicles*

Our self assembly cubicles give an economic benefit over instant portable cubicles by increasing haulage capacity & reducing manufacturing times. In exchange, the customer must set the division in place on site in the location pocket.

Different styles of division are available such as; Straight Leg Mushroom or Super Comfort—cubicle widths adjustable.

It can also be used to cover underground slurry storage. Various sizes are available, all with a built in bed slope which can be fitted with mats or mattresses to increase comfort for your cattle.

As an added bonus, this product is not counted as part of your building structure, which saves on tax bills.
