

## Information Pack: Feed Barrier

- ✓ **Designed to BS8110**
- ✓ **Multiple uses**
- ✓ **Stand alone barrier**
- ✓ **Variable width trough**
- ✓ **Speedy installation**
- ✓ **Feed stuff containment**
- ✓ **Self supporting**

Used singly adjacent to an existing wall, combined with a feed fence as a back wall to contain feed at the filling side of a passage or in pairs, with the centre concreted to form any width of feed trough, this product is very versatile

Reinforcement can be left Exposed in the base to securely tie the barrier into the concrete floor slab.

Removes the need for stub columns to support panels.

The smooth internal finish and bevelled corners allows feed to travel smoothly through the trough and facilitates easy cleaning. Integral lifting eye / rail mounting sockets

### Internal Sizes

Length	2400
