- ✓ Intersections and apertures can be cast in to suit multiple channel sections
- ✓ Bolt on end panels for ease of install & future extension of channels
- ✓ Saves time & money against traditional methods
- ✓ Smooth internal surface, beveled corners, optimised for agricultural hygienic use
- ✓ Can be used with slatted & solid covers

Internal Size - 1000mm(W) x 1000mm(D) x 2150mm(L)
Weight - 1760Kg

Our 1000mm wide x 1000mm deep x 2150mm long channel unit is ideal for longer runs inside and outside of buildings.

This product is manufactured to have a smooth internal surface which greatly improves the flow rate, along with beveled corners for extra strength and hygiene.

The units feature internal slinging which means quick installation, great labour savings and safer work practices than the alternatives.

It is very easily sealed, creating the perfect channel with minimum effort.

Intersections are available for this product, as are stop ends.
