

Information Pack: Splayed Back Feed Troughs

- ✓ Designed to BS8110
- ✓ Reduced amount of feed refills
- ✓ Smooth internal finish
- ✓ Easy relocation design for forklift transport
- ✓ Large feed capacity
- ✓ Shallow enough for cattle to reach the bottom and empty it

It can be supplied with or without feet and can be made with Integral feed rail support socket. The smooth internal finish and bevelled corners allows feed to travel smoothly through the trough and facilitates easy cleaning. The splayed back and rounded corners allow for feed to be stacked at back but will continually fall as needed.
